Objective

Curious and enthusiastic Computer Science undergraduate seeking a technical internship opportunity where I can apply and expand my knowledge in programming, software development, and emerging technologies.

Experience

AI & Machine Learning Intern at Edunet Foundation   **April 2025 – May 2025**

- Completed a 4-week hands-on internship focused on AI, ML, DL, and Gen AI.
- Created a Breast Cancer Prediction Project using supervised machine learning techniques.
- Gained practical experience in tools like Microsoft Learn, Azure Custom Vision, and Neural Networks.
- Learned to work in a disciplined and collaborative environment.

Education

Government Engineering College Siwan   **August 2023 - Expected 2027**
BTech in Computer Science and Engineering

Oxford Senior Secondary School   **April 2020 - March 2022**
Senior Secondary School (12th)

Oxford Senior Secondary School   **April 2019 - March 2020**
Secondary School (10th)

Skills & abilities

- Programming Languages: C, C++
- Web Development : HTML, CSS, JavaScript, React.js, Tailwind CSS, Node.js
- Technologies & Tools : Generative AI, Azure AI, Microsoft Learn Platform
- Core Competencies: Data Structures & Algorithms , AI Fundamentals , Team Collaboration
